

## MIHAMA UTASE ELEMENTARY SCHOOL

It is the 3rd open type school in Makuhari Baytown. It is a low-rise bldg, open to the town. Various criteria were considered to generate the design: i.e. sound, heat environ, multi-disciplinary learning and future flexibility. The bldg is composed of flat slabs (120 × 80) m with no expansion joints, onto which the classrooms, pools & arena are allocated to form a continuous non-hierarchical field of activity.
