Education Practice by Fieldwork, Design build and Various Collaboration

Akio Kuroyanagi

This program is an educational program which carries out fieldwork, design build, and collaboration gradually for "Seaside hut" on the basis of the idea of "participation, experience, thinking, and continuation."

In each stage, by preparing a subprogram, while playing the complementary role of the lesson, the effect was demonstrated also to improvement in greediness for learning, a future course determination, and character building.

Moreover, the result of each stage was summarized as a work or a publication.

In utilization of the "bamboo", while performing the tradition of examples of traditional craftsmanship, and the proposal of new directions, it led to providing people with the opportunity of a new recognition of the history and culture of the area widely.
