AMIDA HOUSE

AMIDA HOUSE based on “amida lot” which is called “Ghost leg” in english. When we draw “Amida lot”, at first we draw vertical line (post), then we draw horizontal line (floor) freely. That is the same way to design of Amida house. This project is designed as a renovation of DOMINO system.

14 floors are studed at randam in a box. Some floors have a view to Mt. Fuji, some floor is conecting to ground, some floor open to sky. Each floor have different function and different hight, dining kitchen, bed room, bike garage, and display space……etc. Various scenery of life are layered in the space. especially for the japanese small house “, Narrowness” makes high density scenery.
