A STUDY ON THE CHARACTERISTICS OF A WORK-UNIT TYPE AS
SPACES FOR INDIVIDUAL LEARNING OF PUPILS AND STUDENTS

A case study on a work-unit type of school buildings in Sweden

英文概要

The aim of this paper is to clarify the space characteristics of Work-Units composing Swedish advanced school buildings from the view point of pupils' and students' activities of learning. The results of this study are as follows.

- 1) A Work-unit is composed of 7-9 various kinds of rooms and 2 kinds of partitions.
- 2) A Work-unit held in four types of learning the same content together, and three types of learning in small groups or individual person.
- 3) Rooms in Work-Unit are divided or connected by opening or closing doors and removable partitions. This operation is easy for students to set spaces for learning by themselves.
- 4) With higher grade, students can be provided opportunities to choose their own spaces and contents for learning.
