

TSURUMI こどもホスピス

TSURUMI CHILDREN'S HOSPICE

TSURUMI Children's Hospice was the first ever opened "community-supported hospice for children" completed on 2016 in Tsurumi Ryokuchi Park.

They support the continued growth of seriously ill children, and respite care to reduce the burden of caregiving on the child's family.

The project aims to optimize and transforms the park into a place that gives support to often isolated families and children in the neighborhood. Where diversified demands aren't met by public aid, individual services such as funds by corporate sponsors and voluntary medical, and childcare professionals serve the center.
