

日南市油津商店街 多世代交流モール

## **COMMUNITY MALL FOR EVERY GENERATIONS**

The renovation of a 28 year-old supermarket planned as one of the main facilities of the Aburatsu Shopping Street Regeneration Project in Nichinan, Miyazaki Prefecture. The building with its steel rigid frame structure is partially reduced and divided into two buildings to create an outdoor space, thereby realizing a complex facility that contains a meeting area and six eating and drinking establishments. The kid's space that faces onto the arcade is free of charge and is open to be used by anyone. In addition to the courtyard, it serves as a gathering place for children and mothers.
