AGRI CHAPEL

This is a Japanese-wooden chapel with a fractal structure system.

The site is surrounded by a large national park overlooking the sea. We tried to connect the activity of the chapel to the natural surroundings seamlessly. In Nagasaki, there is an oldest wooden gothic chapel in Japan known as “Ohura-Tenshudou”. This chapel is not only a famous tourist point, but a place loved and cared by the townsfolk. We tried to design the building as a new gothic style chapel, by using Japanese wooden system.
