

陸前高田市立高田東中学校

**TAKATA-HIGASHI JUNIOR HIGH SCHOOL**

This project is a new building that consolidate the three schools affected by Tohoku earthquake. As a reconstruction project, it is aimed at improving school functions and creating spaces for local residents. As a public place for students & residents, a large timber roof is proposed to be a symbol. The buildings create the assemblage of roofs that harmonized with the mountain scenery behind. The local timber is used for the roof structure and thin structural that bridge long span are achieved by applying tension.
